SARUSAL.COM WEBMAIL

Welcome to our webmail system on www.sarusal.com domain! You should have received your username and password information from admin via email or private message on the website. Here are steps on using it.

- Webmail URL/address to login: <https://webmail.sarusal.com/>
 - Enter your username in front of the @sarusal.com
 - Enter your given/chosen password
- To configure/change user settings on your mailbox, go to: <http://mailboxes.sarusal.com>. Use the same username/password as above.
- To use an email client with your sarusal.com.net email account, login to <http://mailboxes.sarusal.com> and check the *Email Client Configuration* section for settings (smtp, pop, ports, etc.).

Please take note that I will periodically (not sure how often... depends on when I remember) send email out to sarusal.com email addresses requesting replies to confirm that users are still using their sarusal.com email accounts. If I get no response I will typically delete the account. As with sarusal.com website user accounts, I hate unused/abandoned accounts lingering for no reason.
